

**PHARMACEUTICAL CARE PRACTICE ASSIGNMENT**  
**PHARMACIST PATIENT CARE I**  
**FALL TERM 2017**

---

**STUDENT LAST NAME:** \_\_\_\_\_ **FIRST NAME:** \_\_\_\_\_

**GROUP:** \_\_\_\_\_

This is an individual, optional assignment for students who elect to complete in order to earn up to 20 points to replace the quiz grades from 9/18 (Chapter 4) and 9/25 (Chapters 5 & 6). The assignment must be completed individually, handwritten and turned in no later than the start of class on 9/29. Assignments may be turned in prior to class to Mrs. Fry in 633 Salk Hall during normal business hours. This assignment should also serve as a study guide for students in preparation for the exam on 10/13.

**20 POINTS** – Utilize the Pharmaceutical Care Practice text – Chapters 1-6 to complete this assignment

**1. List and describe the two approaches to medication management services:**

**2. List and describe the three “levels” of medication management:**

**3. List and describe the three primary components of a professional practice:**

**4. Write the definition of pharmaceutical care practice:**

**5. List and describe the seven drug therapy problems:**

**6. Describe what is included in a “practice management system”:**

**7. List the four key elements of a philosophy of practice and how pharmaceutical care meets these elements:**

**8. What is the “order of thinking” for a pharmaceutical care practitioner?**

**9. Eliciting the “patient’s medication experience” includes uncovering the following 6 questions:**

**10. List the three components of a “drug therapy problem”?**

**We also encourage you to make note of the following:**

- What is the utility of a comprehensive medication review if no drug therapy problems are found?
- What is the necessity for you to introduce yourself professionally?
- What is expected utility of taking notes during a patient encounter?
- What is the difference between the patient’s medication experience and their medication history?
- What are the components of the medication history?
- How is a comprehensive medication record organized?
- What is the order of identification of a drug therapy problem?
