# ASTHP Practice Advancement Initiative

**Goal:** The goal of this initiative is to significantly advance the health and well being of patients by supporting futuristic practice models that support the most effective use of pharmacists as direct patient care providers.

Transforming how pharmacists in acute and ambulatory settings care for patients				
The Practice Advancement Initiative (PAI) is a <b>profession-led</b> initiative that is <b>empowering pharmacists</b> to take responsibility for <b>patient outcomes</b> in acute and ambulatory care settings.				
Care Team Integration	Leveraging Pharmacy Technicians	Pharmacist Credentialing & Training	Technology	Leadership in Medication Use
<ul style="list-style-type: none"><li>Promotes a team-based approach to health care</li><li>Shifts the roles of the healthcare team to enable pharmacists to optimize their time with patients across the continuum of care</li><li>Enhances the relationship between pharmacists and patients by positioning pharmacists as healthcare providers</li></ul>	<ul style="list-style-type: none"><li>Empowers the pharmacy team to ensure that pharmacy technicians perform all traditional preparation and distribution activities</li><li>Urges technicians to handle non-traditional and advanced responsibilities and activities to allow pharmacists to take greater responsibility for direct patient care</li><li>Promotes technician training and certification requirements, such as the need for uniform standards for advanced technician roles</li></ul>	<ul style="list-style-type: none"><li>Elevates the reputation of the pharmacy team</li><li>Ensures pharmacists, residents, and students have the training and credentials for activities performed within their scope of practice now and in the future</li><li>Promotes the use of credentials to provide services at the top of the scope of practice</li></ul>	<ul style="list-style-type: none"><li>Evaluates the available technologies to support patient safety and quality of care</li><li>Encourages use of available automation and technology to improve patient safety, quality, and efficiency, while also reducing costs</li><li>Identifies emerging technologies to improve pharmacy practice</li></ul>	<ul style="list-style-type: none"><li>Empowers pharmacists to take responsibility for patient outcomes</li><li>Positions pharmacists to promote health and wellness, optimize therapeutic outcomes, and prevent adverse medication events</li><li>Emphasizes that, given their extensive education and training, pharmacists are integral to achieving the best outcomes</li></ul>
