

UH Meds

PGY1 Community-Based Pharmacy Residency Program

Number of PGY1 Positions Available: 12+

OVERVIEW

UH Meds PGY1 Community Pharmacy residents support patients in reaching their health goals through comprehensive medication management and population health. Residents work in Advanced Primary Care practices with physicians, nurses, behavioral health managers, and other patient care support personnel to create comprehensive care plans and ensure patient access to medications. Residents also support transitions of care through the Meds to Beds program and discharge counseling at UH Cleveland Medical Center. Residents with UH Meds PGY1 Community residency have the unique opportunity to work with patients throughout their entire healthcare journey across multiple care settings. UH Meds Ambulatory and Retail pharmacy services continue to grow and innovate delivery of pharmacy services that support patients from the inpatient to the outpatient setting. Residents in this program will serve on the frontlines of patient care, work at the top levels of their degree and license, and will be both leaders and innovators in outpatient pharmacy care.

ABOUT UH MEDS

UH Meds, LLC, offers a range of pharmacy services designed to support a patient's medication needs in the outpatient setting. These services include the management and delivery of retail medications through UH Meds Ambulatory and Retail Pharmacies, complex specialty medications through UH Meds Specialty Pharmacy, and non-oncology infusion drugs in the home via UH Meds Home Care or in our state-of-the-art facility UH Meds Specialty Care Clinic Infusion Center. By extending an array of pharmacy offerings and improving population health, UH Meds helps our patients streamline all of their medical care as we strive to carry out our mission of Exceptional Care Superior Outcomes and Highest Values.

UH Meds

PHARMACY RESIDENCY

PGY1 pharmacy residency programs build upon the Doctor of Pharmacy (PharmD) education and outcomes, to contribute to the development of clinical pharmacists. After completion of the PGY1 program, residents should be able to exceed in medication-related care of patients with a wide range of conditions, and will also be eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy training.

The UH Meds Community-Based PGY1 Residency provides residents with a unique primary care setting. Residents will be integrated into the Advanced Primary Care (APC) clinics across the UH system. As a key member of the APC team the resident will provide hands on and virtual care for patients with a variety of chronic and acute disease states. Ambulatory pharmacy services continue to expand across the UH system allowing the UH Meds

Community-Based residents will have the opportunity to be practice innovators. Residents play a pivotal role in the creation and implementation of expanded services that provide quality and compassionate patient care. This program will prepare residents to create comprehensive patient care plans for both routine and complex patients, be practice innovators to expand access to services for their patients, and provide education to patients and caregivers they will serve. Upon completion of the residency program, the resident will be well qualified to practice as a clinical pharmacist in a variety of community or ambulatory care settings or continue training in a PGY2 program.
